Current Affairs

See T24 Timeline for details.

The colony has been suffering from a series of pirate raids, the last of these being 3208.122.

Direction of attack in the most recent raid was out from the east, over the sea, coming in low. The approach varies between raids, though very infrequently from the north, mostly from West, South and East.

Blue Hope is not the first colony in this system, there has been at least one other previous colony which failed. The ruins can be seen in the middle fo the Eastern Continent.
